

Presenting
Strobe Tech for Underwater Photographers

February 26, 2026
7:15 pm at Sumner Auditorium
Scripps Campus

ANDREW SALLMON

Join veteran photographer Andy Sallmon for a presentation about the latest features available to you in modern underwater strobes. If you have ever wondered what all the gobbledegook that strobe manufacturers are selling is about, but didn't want to watch 45 minute long technical youtube videos, and just want to understand what these things can do for your photography, then this is your chance. Come and watch, share ask questions and see for yourself how the latest strobe tech might benefit your work and broaden your abilities.

Andrew is a seasoned master scuba instructor with more than 45 years of diving experience and 12,000 dives. Over the past 25 years, he specialized in underwater photography, serving as a technical sales representative for Sea and Sea Underwater Photography. In February 2025, Andrew joined Marelux USA, Inc., a leading designer and manufacturer of high-quality underwater imaging equipment, as their new global marketing and sales manager. His extensive experience in diving, underwater photography promotion, and marketing positions him as a valuable asset to Marelux, enabling the company to enhance its global presence and product offerings. Marelux is confident that Andrew's expertise and innovative perspective will significantly contribute to the company's strategic growth and market development in the underwater imaging industry.
