

KEVIN LEE

Presenting
“Polar vs Tropical Diving:
Challenges photographers
encounter in both environments.”

May 28, 2026, 7:15 pm
at Sumner Auditorium
Scripps Campus

Kevin Lee resides in Fullerton, California. He is a member of both The Explorers Club and The Adventurers Club of Los Angeles, where he has served on the Board of Directors. His adventures, in over 45 countries, include multiple treks to Mt. Everest Base Camp and atop Mt. Kilimanjaro. Among his memorable experiences, he fondly recalls a warm hug from Mother Teresa and meeting the Dalai Lama.

After learning to scuba dive more than 20 years ago, Kevin took up underwater photography to share the wonders of the ocean with others. He has dived all 7 Continents, including Antarctica where water temperatures were 29F (-2C), with an emphasis on heterobranchs (sea slugs) which he photographs and collects for scientific research with The California Academy of Sciences, the LA County Museum of Natural History and other institutions.

Kevin's images are on permanent display at Chapman University, Orange California, and have been exhibited at the Branford House, University of Connecticut, Scripps Institution of Oceanography, Monterey Bay Aquarium, and other venues. He has been the Los Angeles Underwater Photographic Society (LAUPS) and Orange County Underwater Photographic Society (OCUPS) Photographer of the Year numerous times. In addition, Kevin's photography has been featured in magazines, newspapers, academic literature and many scuba dive related publications.
